

PLASTIC EDGINGS PLASTBORT™ 45 AND PLASTBORT™ 79

BENEFITS

plastbort™

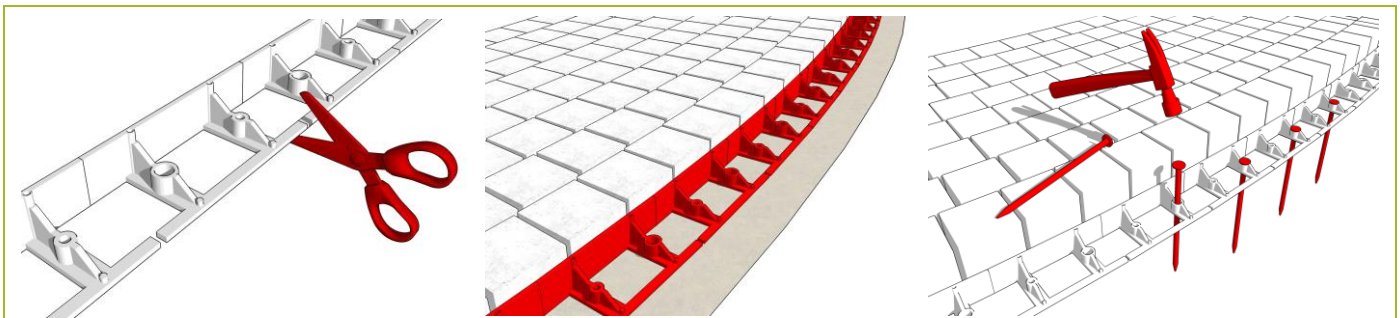

- ✓ 100% recycled
- ✓ Time and cost saving product
- ✓ Simple to use and install
- ✓ Suitable to use metal or plastic sticks
- ✓ Light weight - easy to carry
- ✓ Easy to connect each to another
- ✓ UV resistant

INSTALLATION GUIDE - Step by step -

* Use compacted soil only

Plastbort edgings must be fixed on soft foundations (grass, soil) with plastic sticks (our product), and on hard surfaces (clay, gravel) we strongly recommend using metal nails only.

* After Plastbort installation, we strongly recommend to cover the edgings with selected coating (soil, mulch).

Benefits for garden design - Gives you a permanent professional finish * If it's necessary, the dark color is invisible in soil * Protects plants from trimmers * Easy to install long lasting straight or curved lines *

PURPOSE – for garden designers, DIY amateurs, paver restrain in private and public areas

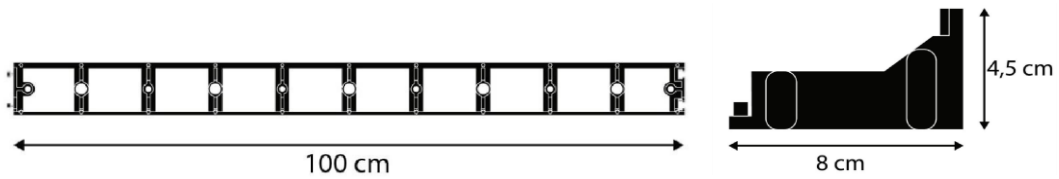

- ✓ PERFECT solution for fast drain paver shaping and installation
- ✓ COMFORTABLE to separate different materials in any weather
